

Cleaner R-2000

Description:

Cleaner R-2000 is a solvent-based high performance cleaner. The product is designed to rinse pipes and casting heads of low pressure polyurethane machinery. Cleaner R-2000 is suitable for multiple usage by filtration and can be recycled by distillation.

Application Fields:

Cleaner R-2000 is suitable for all kind of low pressure casting and spraying processes with polyurethanes.

Application:

To clean the whole machinery it is recommended to start with cleaning the tanks. From the tanks the remaining cleaner can be pumped through the pipes and casting head to clean the whole system. Afterwards the pipes and the head have to be blown out. In case of interruptions during the production process Cleaner R-2000 can be injected to the casting head by automatic devices. Before to restart it is necessary to blow out the head again.

Technical Data:

Composition:	formulation on the basis of glycol ethers
Appearance:	clear liquid
Density [g/cm³]:	approx. 0.95
Flashpoint [°C]:	80

Packaging:

Can	28.5 kg
Drum	190 kg

Storage:

Cleaner R-2000 should be stored in tightly sealed containers and has to be protected from frost, heat and direct sunlight. If these rules are obeyed, the product can be stored for at least 12 months. The expiry date is stated beneath the production date on the labels of each container.

Information for regulations on safety and transportation are provided in the safety data sheet

Further information:

Product technical information and data is based on the best information available and does not constitute or imply a warranty or patent infringement of any kind. The user is responsible for testing product suitability prior to use in production.
