

## Cleaner R-52

### Description:

Cleaner R-52 is a solvent-based 'heavy duty' - cleaning agent, intended for the cleaning of moulds of all material which are used in industrial applications like steel, aluminum, polyester-, epoxy-resin or other reinforced thermoset materials. Cleaner R-52 is biologically degradable and shows excellent results, even at room temperature. Cleaner R-52 dissolves residues from rubber, thermoset materials, resins and additives (ex. oils, waxes).

### Application Fields:

Cleaner R-52 is used as a universal purpose mould cleaner.

### Application:

Dip the objects to be cleaned into Cleaner R-52. After the cleaner has penetrated the metal surfaces for a couple of minutes, simply wipe it off. Instead of dipping the objects into Cleaner R-52, it may as well be applied through brushing. Remains of Cleaner R-52 can easily be removed with a dry cloth.

### Technical Data:

<b>Composition:</b>	solvent solution
<b>Appearance:</b>	colourless liquid
<b>Density [g/cm<sup>3</sup>]:</b>	approx. 0.83
<b>Flashpoint [°C]:</b>	approx. 25

### Packaging:

Can	24 kg
Drum	160 kg

### Storage:

Cleaner R-52 should be stored in tightly sealed containers and has to be protected from frost, heat and direct sunlight. If these rules are obeyed, the product can be stored for at least 12 months. The expiry date is stated beneath the production date on the labels of each container.

### Information for regulations on safety and transportation are provided in the safety data sheet

### Further information:

Product technical information and data is based on the best information available and does not constitute or imply a warranty or patent infringement of any kind. The user is responsible for testing product suitability prior to use in production.
