REACH EU-Chemicals Policy Initiative

Dear Sir or Madam

Since our company has been categorized as a *downstream user*, subject to the REACH-guidelines, we are exclusively dependent on the information provided by our suppliers.

After having consulted our vendors, we may now assure you, that all individually required raw materials have been registered or pre-registered. A pre-registration status does not guarantee a product to be fully registered eventually.

We will commence contacting our customers immediately in case we obtain any further information from our suppliers.

We thank you for your understanding, that we are unfortunately unable to field any individual questions at this point in time.

Kind Regards

i.A. **Alexander Marek**
Quality Management
